

E-9-1-1

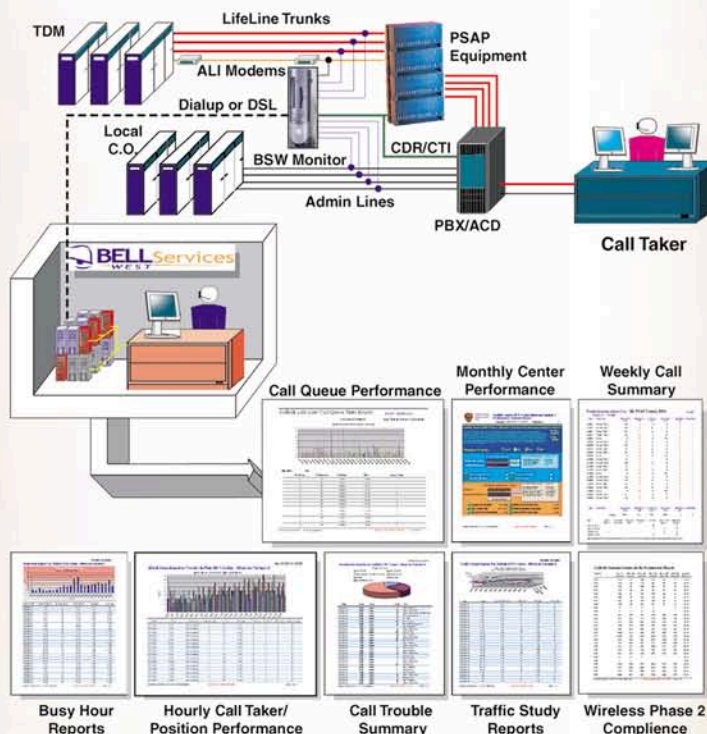

STARS E-9-1-1 NETWORK MONITORING SYSTEM

Bell Services West, the industry leader for complete monitoring and reporting solutions.

 **BELL** Services
WEST

E-9-1-1 Network Monitoring System

Bell Services West equipment monitors your trunks and lines 24 hours a day, 7 days a week, 365 days a year. You are alerted to situations before the public is aware.

Bell Services West's comprehensive reporting and monitoring solutions enable emergency PSAP centers to provide high quality, efficient, and cost effective service. Bell Services West will help you optimize the vital communication links between the citizen and public safety agencies you support. Our proactive monitoring and reporting services will allow you to insure accurate identification of the citizen's location and public safety response needs as well as the quick and accurate activation of public safety services.

Bell Services West will help you provide superior service to your citizens and to the public safety agencies that you support through:

- validation of CDR/CTI data
- accurate identification of trunking requirements
- validation of ALI wireless performance and compliance
- new technology interoperability issues (including: PSAP VOIP Implementations, Selective Router Implementation, PSAP cutovers, etc.)
- arbitration support between you and your Service Provider and/or CPE vendor
- historical data on your center's performance

Your center must answer every request for help, quickly, accurately and professionally every time. Bell Services West can be your advocate to meet your unique responsibilities and goals.
