Select Database

Save 3 Clear Test Connection 4

< Back Next > Cancel

Step 2 – Select any table containing Call Record information from the list and Click on the <Next> button.

USB Monitor List Tables

BELL Services WEST

PSAP Benchmark

Select all the tables that may contain Call Information from the list below.

CallDetailsPart
CallRecords

If you do not see the Tables containing call information, it maybe that the Table Permissions have not not been set for your User ID. Have your Service Provider enable Read or Select only access to the required Tables for your Login.

< Back Next > Cancel

Step 3 – The BSW application will then retrieve the table data and store I in file on the Flash RAM. When all the data has been retrieved, click on the <Finish> button.
